easySDI - Enhancement #1392
Remove "fee without profile"

01/03/2017 02:27 PM - Blatti Yves

Status:	Accepted		**Start date:**	01/03/2017
Priority:	Low		**Due date:**	
Assignee:	Blatti Yves		**% Done:**	0%
Category:	SHOP		**Estimated time:**	0.00 hour
Target version:				
Sponsor:			**Ergonomic impact:**	Every basket will have a defined price, large impr
Functional impact:	Remove the ability to have "opaque" prices in basket.			

Description

Pricing has been fully implemented in easySDI (#643), we can now describe the price of a product by:

- free
- paid (fee with a pricing profile)
  - by surface
  - by fixed base price
  - with min/max
  - any combination of the above
  - +free for categories
  - +special rebates
- paid (fee without a pricing profile)
  - this was the previous way of having a paid product, the user cannot know the price if the basket
  - the user must ask for an estimate if he want to ensure the price before ordering
  - providers must manage the estimate workflow (human or via webservice)

We propose to remove the "fee without a pricing profile" pricing method
Why ?

- **No use**
  - At ASIT VD we were the last know users of this pricing method
  - Our providers have now moved to the "pricing profile" method for all the products
- easySDI would **offer a finite/known basket price for every order** if we remove the feature
- **Large simplification** in code and apprehension of the application
  - No more estimate ! Every basket has a price
  - No more special cases in code for MCV and Web Services

History

#1 - 01/06/2017 10:28 AM - Van Hoecke Hélène

- Status changed from Request For Comments to Accepted

- Assignee changed from Technical Committee to Blatti Yves

- Priority changed from Normal to Low

Accepted by TC.
